RETRACTION STATEMENT

The above article has been **retracted following concerns regarding authorship and authorization for publication that arose after publication.**

The corresponding author subsequently acknowledged responsibility for the circumstances leading to the publication and formally requested that the article be retracted.

Following consideration of the matter, the journal has determined that the article should no longer remain part of the published scholarly record in its current form. Accordingly, the article is formally retracted.

This retraction is issued to maintain the accuracy, transparency, and integrity of the journal's published record.

The original article remains available for the purposes of maintaining the scholarly record and is **clearly marked as RETRACTED**. Readers should not treat the retracted article as part of the journal's valid published literature.

Retraction Date: 03 October 2026
